

## **CANNON ON THE TABLE!**

**A SHOOTER GAME WHERE SCENARIO IS REAL AND DEFINED BY THE PLAYER. IT IS AUGMENTED REALITY!**

BRAZIL, August 6th, 2016 – This game is never the same. Every time a player plays this one, it will be different. It is augmented reality and player will feel like playing in the real world!

The player controls a cannon and wooden boxes are falling just above players real table (or whatever surface he/she chooses!). The objective is to destroy as much boxes as possible in 60 seconds by shooting them. The progress of the player is recorded in a global leader board, where he/she can see other player's highscore and where he/she can try to reach the #1 rank.

**"Cannon on the table" is available for Android and it is free for download at [Google Play here](#).**

Ratings are reaching 5 starts there...

### **ABOUT US:**

We are a small indie game studio located in Brazil trying hard to create amazing experiences.
