**ULTRAFLOW 2** is an **arcade-puzzle game** for mobiles and tablets which combines the gameplay of air hockey and mini-golf in a chill and minimalist experience. No score, no timer, the only challenge is dexterity. Just fling the ball to the goal!

ULTRAFLOW 2 includes **180 free levels**. Players can get access to the **Hardcore version** of these levels for 1.50 USD, which means that the full game contains **360 levels**.

Ultrateam is composed of four students currently in their final year of Game Design master's degree at Supinfogame Rubika, the french leading school dedicated to video game careers. After the first ULTRAFLOW, nearly **4 million players and a 4.5/5 rating**, they decided to develop a sequel to answer the demand of new levels. As for the first one, ULTRAFLOW 2 was developed on their spare time, aside of their school projects and internships.
