

We are proudly announcing Guardians of Arcadia®, a indie JRPG made from fans to fans. Our goal is to provide a nostalgic feel on a genre that gently but slowly is getting more attention, mainly due to indie game developers like ourselves.

Months ago, FABULA EPICA® embarked on their own quest to rediscover the genre of JRPG's. During their soul-searching mission, they unearthed past consumer surveys, conducted new research, re-read every game review, listened to lots of passionate pleas and opinions from gamers and re-played through every well known products. From this introspection and open-minded search for a fresh perspective, Guardians of Arcadia was born.

Guardians of Arcadia® is a single-player RPG with inspiration in the successes of the 1990's. The game will incorporate popular elements of games on that decade. Some of those elements are the design of chibi characters, random battles, the combat system through menus, and a fully explorable world.
