Eastern-themed continent, game-changing systems, and hundreds of quality-of-life upgrades arrive today in version 2025.1.

July, 2025 - ViVa Games released “**The Continent of Gangan**,” the most ambitious expansion ever for its cross-platform 2-D MMORPG **Kakele**. Version 2025.1 unlocks a mystical new land inspired by Eastern folklore, introduces raids, and overhauls everything from PvP balance to backpack space, all shaped by direct community feedback.

“Gangan is more than just a map; it’s the next chapter of Kakele’s living world,” said **Lefyr**, Marketing Director at ViVa Games. “Players asked for deeper lore, more risk-reward hunts, and fairer PvP - so we rebuilt entire systems from the ground up. This is the update that sets the tempo for our new six-month release cadence.”
